

Solar Control Window Films

NT PerLite Ceramic i (interior)

NT PerLite Ceramic i is a highly durable, ceramic-based interior window film. NT PerLite Ceramic i was developed using a proprietary patented advanced ceramic coating technology. As a result, its attractive neutral grey color delivers excellent solar energy rejection, with surprisingly low visible light reflectance. This makes NT PerLite Ceramic i an ideal solution for economic energy-saving projects when it's important to preserve view and retain a natural appearance - both inside and out. **Available in 20, 35, 50 and 70 VLT**, NT PerLite Ceramic i is particularly popular in residential and commercial projects.

- >> High heat rejection for enhanced comfort and reduced cooling costs
- >> High glare reduction - improves screen viewing, reduces eye-strain
- >> Neutral color - provides natural gray appearance, inside and out
- >> 99+% UV block limits fading and damage from the sun

Features and Benefits

- >> High visible light transmission that is barely discernible on glass; high levels of natural daylight
- >> Low reflectivity preserves views night and day
- >> 99+% UV block reduces fading and damage from the sun
- >> Natural appearance maintains building's original façade
